## Schedule of proposed modifications for submission

December 2024

## CSD01.1 Joint Local Plan 2041 – Schedule of proposed modifications for submission December 2024

The schedule includes a breakdown of proposed Main and Additional (Minor) Modifications to the Joint Local Plan alongside modifications the councils propose for the Policies Map and Sustainability Appraisal. The modifications are set out to include:

- the location within the plan (whole document or chapter) and/or documents to which the modification relates
- the relevant policy or paragraph for the modification to help the reader identify the areas of the plan proposed for modification
- a description and depiction of the modification shown in red (strikethrough where the modification proposes a deletion)
- the reason for the modification

The Main Modifications in the schedule are proposals that the councils will be inviting the Inspectors to consider through the examination of the Joint Local Plan. These modifications are proposed on the basis that:

- they are intended to address soundness matters by making the policies of the JLP effective and deliverable, and
- the final decision on whether any will proceed will be a matter for the Inspector.

### Proposed Main Modifications

Mod No.	Chapter	Category/ Policy No./ Paragraph No.	Modification	Reason
MM01	Chapter 3	Para 3.7, Obj.2	Help transition to net zero carbon districts by <del>2030 for South Oxfordshire and 2045 for Vale of White Horse</del> , mindful of the districts' carbon budgets, by...	Update in relation to South Oxfordshire District Council's latest climate action targets. All other references to this in supporting text of the plan

Mod No.	Chapter	Category/ Policy No./ Paragraph No.	Modification	Reason
				have been proposed as minor modifications.
MM02	Chapter 4	Policy CE2 – Net Zero Carbon Buildings	Amend policy to remove reference to carbon offsetting and delete text that expresses a preference towards additional renewable energy generation, as follows: 6 a) Energy offsetting is primarily to be delivered via developer contributions to a fund which would be ring-fenced for use only to deliver local projects that <del>save the same amount of carbon or</del> deliver the required shortfall in renewable energy, <del>with a preference to invest in additional renewable energy generation to ensure net zero carbon buildings are delivered.</del>	Reference to carbon offsetting contradicts the energy offsetting requirement stated earlier in the sentence (carbon offsetting is different to energy offsetting). Additional renewable energy generation is expected with energy offsetting and therefore unneeded.
MM03	Chapter 5	Policy SP2 – Settlement hierarchy	Amend settlement hierarchy table as follows: Warborough & Shillingford NE of A4074	Correction of an error
MM04	Chapter 5	Para 5.16, supporting text to Settlement hierarchy policy	Amend para 5.16 as follows: 5.16 The Tier 1 and 2 settlements in Vale of White Horse retain their existing settlement boundaries <sup>25</sup> which are shown by the Policies Map. The Joint Local Plan does not propose to introduce additional settlement boundaries, although boundaries could be reviewed and updated in the future through neighbourhood plans. <del>This strategic policy SP2 will supersede existing settlement boundaries and infill policies in made neighbourhood plans at settlements within Tier 4 or the countryside.</del>	Clarification on the implications for made Neighbourhood Plans
MM05	Chapter 5	Policies SP3 – SP8	Amend reference to heritage assets in Policies SP3 to SP8, as follows: conserve and enhance <del>the significance of</del> the town's heritage assets...	Consistency with national policy
MM06	Chapter 6	Policy HOU2 – Sources of housing supply	Update tables for housing supply in South Oxfordshire and Vale of White Horse (including typo of date for Vale) as follows: 1) Within South Oxfordshire, the housing supply comprises the following:	To reflect the latest delivery information on the housing sites as set out in the Five Year Land Supply Statements
