1. INTRODUCTION

- 1.1. This Statement sets out the Vale of White Horse's (the council) housing land supply position and housing trajectory against the housing requirement in the submission version of the Joint Local Plan 2041 ("the emerging Plan"). This Statement explains the council's approach to calculating the five-year housing land supply, provides an assessment of deliverable land within the district and establishes the council's five-year housing land supply position, as well as setting out the housing trajectory over the entire plan period.
- 1.2. This Statement represents the housing land supply position as of the 1 April 2024, covering the period between 1 April 2024 and 31 March 2029. This Statement provides a year by year, and site by site trajectory of the expected housing supply in the district between 1 April 2024 and 31 March 2029 and over the plan period.
- 1.3. The council has published a separate housing land supply statement to accompany its emerging Joint Local Plan, which assesses the supply against the housing requirement in that plan¹. This Statement only assesses the housing land supply against the local housing need for Vale of White Horse.

The council can demonstrate a 7.09 years' supply of housing land.

2. NATIONAL AND LOCAL POLICY, AND RELEVANT CASE LAW

- 2.1. This chapter summarises the relevant national and local policy. It also examines how the courts have assessed these policies.

Demonstrating a 5-year Housing Land Supply Position

- 2.2. The publication of the December 2023 National Planning Policy Framework (NPPF) introduced new policy considerations for demonstrating a housing land supply. In particular, whether a Local Planning Authority is required to demonstrate a housing land supply position and the number of years supply required to be demonstrated.

- 2.3. The NPPF (December 2023) states at paragraph 76:

“Local planning authorities are not required to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years’ worth of housing for decision making purposes if the following criteria are met⁴⁰:

a) their adopted plan is less than five years old; and

b) that adopted plan identified at least a five year supply of specific, deliverable sites at the time that its examination concluded.”

- 2.4. Footnote 40 of paragraph 76 references the transitional arrangements set out in footnote 79 of the framework. Footnote 79 states *“As an exception to this, the policy contained in paragraph 76 and the related reference in footnote 8 of this Framework should only be taken into account as a material consideration when dealing with applications made on or after the date of publication of this version of the Framework.”*

- 2.5. For applications under consideration that were made prior to the publication of the December 2023 NPPF, the transitional arrangements are relevant. Paragraph 226 of the NPPF states:

“From the date of publication of this revision of the Framework, for decision-making purposes only, certain local planning authorities will only be required to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of four years’ worth of housing (with a buffer, if applicable, as set out in paragraph 77) against the housing requirement set out in adopted strategic policies, or against local housing need where the strategic policies are more than five years old⁸⁰, instead of a minimum of five years as set out in paragraph 77 of this Framework. This policy applies to those authorities which have an emerging local plan that has either been submitted for examination or has reached Regulation 18 or Regulation 19 (Town and Country Planning (Local Planning) (England) Regulations 2012) stage, including both a policies map and proposed allocations towards meeting housing need. This provision does not apply to authorities who are not required to demonstrate a housing land supply, as set out in paragraph

76. These arrangements will apply for a period of two years from the publication date of this revision of the Framework.”

2.6. The housing requirement set out in the Vale of White Horse Local Plan 2031 is more than five years old, which is discussed below, therefore a five-year housing land supply position is required to be demonstrated. However, the Regulation 19 publication period for the emerging South Oxfordshire and Vale of White Horse Joint Local Plan closed on the 12 November 2024. The emerging Plan has reached regulation 19 stage and contains both a policies map and proposed allocations towards meeting the housing need. For applications or appeals made prior to the publication of the December 2023 NPPF we are therefore required to demonstrate a supply of deliverable sites to provide for 4 years' worth of housing need.

National Policy and Guidance – Housing Requirement

2.7. Paragraph 77 of the NPPF states:

“In all other circumstances, local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide either a minimum of five years' worth of housing⁴¹, or a minimum of four years' worth of housing if the provisions in paragraph 226 apply. The supply should be demonstrated against either the housing requirement set out in adopted strategic policies, or against the local housing need where the strategic policies are more than five years old⁴². Where there has been significant under delivery of housing over the previous three years⁴³, the supply of specific deliverable sites should in addition include a buffer of 20% (moved forward from later in the plan period).”

2.8. This means that as we are required to demonstrate a housing land supply position, it should be against the local housing need figure as the housing requirement strategic policy is more than five-years old.

2.9. In addition, we need to consider whether any buffer should be applied to the housing requirement. Footnote 43 explains that significant under delivery will be measured against the Housing Delivery Test (HDT), with delivery below 85% of the housing requirement representing significant under delivery. The 2022 HDT measurement is the latest published position at the time of writing. It shows that Vale of White Horse can demonstrate a result of 195%, significantly in excess of the 85% benchmark. Therefore, no buffer is required to be applied to the housing requirement.

2.10. The PPG also provides guidance on how to consider past under delivery in calculating the five-year housing requirement. The PPG states for under delivery that:

“The level of deficit or shortfall will need to be calculated from the base date of the adopted plan and should be added to the plan requirements for the next 5-year period (the Sedgfield approach), then the appropriate buffer should be applied. If a

strategic policy-making authority wishes to deal with past under delivery over a longer period, then a case may be made as part of the plan-making and examination process rather than on a case by case basis on appeal.”²

2.11. The Local Housing Need figure produced using the standard method takes account of past housing delivery through the affordability adjustment. Consideration of previous housing delivery is not required.

National Policy and Guidance – Housing Supply

2.12. To demonstrate a housing land supply position, paragraph 77 of the NPPF states *“local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide either a minimum of five years’ worth of housing, or a minimum of four years’ worth of housing if the provisions in paragraph 226 apply.”*

2.13. The NPPF’s glossary defines a deliverable housing site as follows:

“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:

- a) Sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*
- b) Where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.”³*

2.14. The PPG provides further guidance on what evidence councils can use to demonstrate the deliverability of those sites in “Category b)” above (i.e. major developments without detailed consent), though it should be noted this is not a closed list:

² PPG, Paragraph: 031 Reference ID: 68-031-20190722

³ NPPF, Annex 2, Glossary

Such evidence, to demonstrate deliverability, may include:

- *current planning status – for example, on larger scale sites with outline or hybrid permission how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out the timescale for approval of reserved matters applications and discharge of conditions;*
- *firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers’ delivery intentions and anticipated start and build-out rates;*
- *firm progress with site assessment work; or*
- *clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects.*

2.15. We have followed this guidance and provide evidence of the deliverability of these “Category B” sites in Appendices B and F.

Local Policy

2.16. The Vale of White Horse Local Plan 2031 consists of the Local Plan 2031 Part 1: Strategic Sites and Policies (Part 1 plan) which the Council adopted in December 2016, and the Local Plan 2031 Part 2: Detailed Policies and Additional Sites (Part 2 plan) which the Council adopted in October 2019⁴.

2.17. Core Policy 4a: Meeting our Housing Needs in the Local Plan Part 2 sets out the district’s housing requirement of 22,760, which includes 2,200 dwellings to meet the Vale of White Horse’s agreed quantum of Oxford’s unmet housing need. The 2,200 dwellings for Oxford City are to be provided between 2019-2031 for supply purposes.

2.18. Core Policy 5: Housing Supply Ringfence in the Part 1 plan sets out the Council’s approach to determining its 5-year housing land supply.

Local Plan Part 1: 5-Year Review

2.19. On 3 December 2021, the Council’s Cabinet approved a Regulation 10a review (five-year review) for the Local Plan Part 1. This is because the Local Plan Part 1 became 5 years old in December 2021, and the Council needed to

⁴ www.whitehorsedc.gov.uk/localplan2031

undertake a review of the policies within it to determine their continued fitness for purpose – to account for their consistency with national policy, current evidence and any changes in local circumstances.

- 2.20. Our review concluded that the housing requirement identified in Core Policy 4 of the Local Plan 1 requires updating. Therefore, for monitoring and housing land supply purposes, in accordance with Paragraph 74 of the NPPF, the housing requirement is calculated using Government’s calculation of local housing needs (the standard method). This is currently a housing need of 663 dwellings per annum.
- 2.21. This process also concluded that the standard method figure should be supplemented with the 183dpa between 2019 and 2031 to accommodate unmet housing need from Oxford in accordance with Core Policy 4a of the Local Plan Part 2. This leaves a total annual housing need, for five year land supply purposes, of 816 dwellings per annum.
- 2.22. The review also assessed Core Policy 5: Housing Supply Ringfence. We concluded that Core Policy 5 is connected to the housing requirement in Core Policy 4 and as such requires updating also. There is no mechanism for applying a shortfall or ringfence to the standard method calculation. Core Policy 5 will therefore no longer be used for monitoring purposes.
- 2.23. You can read more information about the Council’s review of its Local Plan Part 1 on our website at www.whitehorsedc.gov.uk/localplan2031
- 2.24. The Planning Inspectorate supported the Council’s decision to use this housing requirement for the purposes of monitoring our 5 year land supply in a decision issued on 13 March 2023, for land east of Grove⁵.

Relevant case law

- 2.25. The courts have interpreted the NPPF and NPPG, providing additional commentary on how the council can determine if a site is deliverable.

ST. MODWEN⁶

- 2.26. In his decision, Lord Justice Lindblom addressed what constituted a “deliverable site”. He rejected the argument presented by the appellant that the council should assess “*what would probably be delivered*” on the site, and that there is a distinction between the NPPF’s test of “deliverability” and the “probability of delivery”⁷. He went on to state that “*the fact that a site is capable of being delivered within five years does not mean that it necessarily will be*”⁸

- 2.27. Furthermore, he stated:

⁵ Appeal Ref: APP/V3120/W/22/3310788

⁶ St. Modwen Developments Ltd v Secretary of State for Communities and Local Government [2017] EWCA Civ 1643 (20 October 2017)

⁷ Idem, Paragraphs 31 and 32

⁸ Idem, Paragraph 35

“[each of the considerations] goes to a site’s capability of being delivered within five years; not to the certainty [...] or probability that it actually will be...

Sites may be included in the five-year supply if the likelihood of housing being delivered on them is no greater than a ‘realistic prospect’...

this does not mean that for a site properly to be regarded as ‘deliverable’, it must necessarily be certain or probable that housing will be in fact delivered upon it”

(Lindblom L J’s Emphasis) (Our Emphasis)

2.28. Finally, in Paragraph 42 of the judgment Lindblom L J reiterates that deliverability does not require certainty that the sites will actually be developed within the five year period, and that deliverability will not be disproved by showing that there are uncertainties.

EAST BERGHOLT

2.29. Lindblom again considered the question of what constitutes a deliverable housing site in this Court of Appeal decision from 2019. He gave further explanation of the conclusions of St Modwen identified above.

2.30. Lord Justice Lindblom states that the following:

50. [Paragraph 47 of the NPPF (2012) is not prescriptive. It does not lay down any fixed method for applying the test of "deliverability", to be used in every case. A "realistic prospect" is not equated to any specific level of likelihood. Nor are there any criteria for deciding this question beyond what is said about the treatment of "[sites] with planning permission" in footnote 11. Subject to that, and to the further relevant guidance in the PPG, the policy leaves the assessment of a "realistic prospect" to the decision-maker's own planning judgment, which the court will only undo on conventional public law grounds. It is not for the court to stipulate how firm a "prospect" must be if it is to be "realistic".

51. The policy does not prevent a decision-maker reasonably taking the view, as a matter of planning judgment, that a particular site or sites on which it was not certain or confident that development would occur within five years should be excluded from the five-year supply of housing land. It does not state, for example, that sites without planning permission, but with a resolution to grant subject to a section 106 planning obligation being entered into, should always, or usually, be included in the supply, or that such sites should be included if they have been allocated for housing in the development plan. The same may also be said of the subsequent revisions of the policy in 2018 and in 2019 – in which the definition of a "deliverable" site has been somewhat expanded. Put simply, the degree of confidence required in the "deliverability" of sites is for the decision-maker to decide, within the bounds of reasonable planning judgment.

[...]

53 It is clear then that the policy in paragraph 47, and the PPG guidance upon it, accommodate different views on a "realistic prospect" of delivery. A local planning authority can take a more cautious view on this question, or a more optimistic view, than other authorities might. If it does, it is not for that reason acting contrary to the policy, or unreasonably. Had the Government meant to impose a rigid approach, or greater consistency than the policy and guidance require, it would surely have done so. If it had wanted to define exactly what it meant by a "realistic prospect" it could and would have done that. But it has not – either in the policy it originally issued or in the two revisions, or in the PPG.

2.31. This judgment supports the Court's interpretation of policy identified in St Modwen. The assessment of a "realistic prospect" of delivery and the evidence to support this, will be a matter of planning judgment.

LAND AT SITE OF FORMER NORTH WORCESTERSHIRE GOLF CLUB LTD⁹

2.32. The two previous Court of Appeal Decisions referenced above took account of the 2012 definition of what constitutes a 'deliverable' site. The revised NPPF published in 2018 added further detail to this definition, and this expanded definition was considered further in an appeal decision determined by the Secretary of State, Land at Site of Former North Worcestershire Golf Club Ltd.

⁹ APP/P4605/W/18/3192918

This definition remains in the December 2023 NPPF. At paragraph 20 of the Secretary of State's decision they consider the meaning of 'deliverable' and agrees with the Inspector's views that 'realistic prospect' remains the central test against which deliverability of a site must be measured. The Inspector for the appeal considered the difference in definitions of 'deliverable' between the 2012 and 2018 NPPF and found the following:

14.39 The essential consideration under both definitions is whether or not sites included in the 5YHLS will actually deliver housing within the 5 year period. In my view, that assessment is still to be made on the basis of realistic prospect and not on any greater burden of proof. As established in the St Modwen judgment (paragraph 38), that does not mean that for a site to be considered deliverable it must be certain or probable that the housing will in fact be delivered upon it. [8.27] In that paragraph, Lord Justice Lindblom refers to Lord Gill's statement, in paragraph 78 in the Suffolk Coastal judgment (CD C1), that the requirements set out in the NPPF reflect the futility of local authorities including sites in their 5YHLS which have no realistic prospect of being developed within five years.

14.40 The previous definition included a requirement for "clear evidence" to rebut the presumed deliverability of sites with planning permission. That did not require those challenging the inclusion of a site with planning permission to do more than demonstrate that there is no realistic prospect that housing will be delivered on that site. The new definition requires 'clear evidence' that housing completions will begin within 5 years on certain categories of site. That does not, however, mean that the local planning authority must demonstrate certainty that housing completions will begin within that period.

2.33. Therefore, the central test for demonstrating whether a site without detailed planning permission is 'deliverable' is whether there is a realistic prospect, not certainty, that housing will be delivered on the site within five years.

3. CALCULATING THE FIVE-YEAR HOUSING LAND REQUIREMENT

3.1. This chapter sets out how the council has calculated its five-year housing requirement for the emerging Plan. This is derived from the following:

- The Local Housing Need for Vale of White Horse as determined by the Standard Method;
- adding the annualised requirement from the agreed quantum of Oxford City's unmet need; and
- adding an appropriate buffer.

Annual Housing Requirement

3.2. Table 1 sets out the housing requirement for each year in the five-year period, calculated taking into account the factors above. The housing requirement includes both Vale of White Horse's own housing need and the apportioned amount of Oxford City's unmet housing need, which are 633 and 183 dwellings per annum respectively.

Table 1: Annual housing requirement for 2024 to 2029						
Year	2024/25	2025/26	2026/27	2027/28	2028/29	Total
Housing requirement (dwellings)	816	816	816	816	816	4,080

Shortfall or Over Delivery

3.3. For the purposes of demonstrating a five-year supply, the council must consider if a shortfall in housing delivery has been generated.

3.4. The Local Housing Need figure produced using the standard method takes account of past housing delivery through the affordability adjustment and there is no need to assess previous under or over delivery.

Housing Delivery Test

3.5. The Housing Delivery Test¹⁰ is an annual measurement of housing delivery over the last three financial years in the area of relevant plan-making authorities. The Government intends to publish the results annually in November. Government published the latest results in January 2024 (for the year 2022), with Vale of White Horse's result being 195%.

¹⁰ www.gov.uk/guidance/housing-supply-and-delivery#housing-delivery-test

3.6. As the Housing Delivery Test Measurement Rulebook¹¹ explains, for areas with an up to date adopted housing requirement, the housing requirement used for the purposes of the test will be whichever is the **lower** of the adopted housing requirement or the minimum local annual housing need figure¹².

3.7. Therefore in Vale of White Horse’s case, with no currently up to date housing requirement figure, the minimum local annual housing need figure (2,136 dwellings as of the 2022 measurement), is used.

Buffer

3.8. As explained in paragraph 2.11 above, the NPPF¹³ states that a buffer to the housing requirement should only be applied if there has been a significant under delivery of housing, as measured against the Housing Delivery Test. The council has not under delivered over the three previous years and thus no buffer is required.

Total Five-Year Housing Requirement

3.9. Table 2 details the district’s five-year housing land supply requirement for the emerging Plan.

Table 2: Five-year housing requirement			
			Note
A	Vale of White Horse Local Housing Need, as determined by the Standard Method	3,165	633 x 5
B	Oxford City’s annualised unmet need requirement	915	183 x 5
C	Previous under / over delivery	N/A	Previous delivery not required to be considered
D	Required buffer	N/A	No buffer required
	5-year requirement	4,080	(A+B+C)*D

¹¹ Available from https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/728523/HDT_Measurement_Rule_Book.pdf

¹² As determined by the standard method for assessing the minimum local annual housing need figure

¹³ NPPF, Paragraph 74

4. DELIVERABILITY OF SITES

- 4.1. In accordance with the NPPF and PPG, as detailed above, the supply of deliverable housing land in the District is considered to comprise of two types of site; “Category A” and “Category B” sites, as well as a windfall allowance.

Category A sites

- 4.2. Category A sites are those referred to under point A of the definition of a deliverable housing site in the NPPF’s Glossary. These are:

“sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).”

- 4.3. Therefore, any Category A sites are automatically included in our housing land supply assessment for the next five years, unless there is clear evidence homes will not be delivered.
- 4.4. For major sites (ten or more dwellings) with detailed permission, we have applied average lead-in times and build-out rates from developments in Vale of White Horse (as shown in Appendix C and D). This helps us determine a realistic delivery rate for these homes within the 5-year period, resulting in some units falling outside of the timeframe and being excluded from the 5-year supply.
- 4.5. For minor sites (one to nine dwellings) with permission, we assume delivery will take place over the next three years. This is a reasonable timeframe for the delivery of minor sites, considering the standard condition that the council applies to all sites, requiring work to commence within three years.
- 4.6. **We expect 2,854 homes to be delivered on Category A sites during the five-year period.**

Category B sites

4.7. Category B sites are those referred to under point B of the definition of a deliverable housing site in the NPPF's Glossary. These are:

“where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.”¹⁴

4.8. The PPG provides further information on what constitutes clear evidence that a site will come forward. This is:

- current planning status – for example, on larger scale sites with outline or hybrid permission, how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out the timescale for approval of reserved matters applications and discharge of conditions;
- firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers' delivery intentions and anticipated start and build-out rates;
- firm progress with site assessment work; or
- clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects.

4.9. The council has produced an analysis of site lead-in times and build-out rates to inform our assessments. These can be found in Appendices C and D. We used these average lead-in times and build-out rates, alongside the information suggested by the PPG above, in consultation with case officers, to form an assessment of the likely build-out rates for Category B sites.

4.10. We then presented this information to site promoters and developers of Category B sites and asked them to verify whether our assessment was realistic. We assessed the responses from the site promoters and balanced this against all the evidence we had collected and reached our own judgment on the site's likely deliverability in line with the NPPF, PPG and case law. In some instances, developer responses resulted in us accelerating sites ahead of the average lead-in times and build-out rates, and others it resulted in us pushing sites back.

¹⁴ NPPF, Annex 2: Glossary

- 4.11. All the evidence for our Category B sites is presented in detailed pro-formas in Appendix F. These pro-formas show what information we presented to the site promoters, as well as how this changed following feedback.
- 4.12. **We expect 2,526 homes to be delivered on Category B sites during the five-year period.**

Windfalls

- 4.13. As defined by the NPPF in Annex 2, windfall sites are sites that are not specifically identified in the development plan. The NPPF and PPG allow councils to add a windfall allowance as part of their five-year housing land supply where there is compelling evidence that they will provide a reliable source of supply:

“Where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends. Plans should consider the case for setting out policies to resist inappropriate development of residential gardens, for example where development would cause harm to the local area.”¹⁵

- 4.14. The Planning Practice Guidance (PPG) sets out the method for assessing Housing and Economic Land Availability. Stage 3 sets out the method for undertaking a windfall assessment. This states that:

“A windfall allowance may be justified in the anticipated supply if a local planning authority has compelling evidence as set out in paragraph 70 [now paragraph 71 above] of the National Planning Policy Framework. Local planning authorities have the ability to identify broad locations in years 6-15, which could include a windfall allowance (using the same criteria as set out in paragraph 67 [now paragraph 68] of the National Planning Policy Framework).¹⁶

- 4.15. Based on the NPPF and PPG, the council is justified in using a windfall allowance if there is compelling evidence which has regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends. We have therefore prepared a methodology to assess Vale of White Horse’s historic windfall rates and consider those trends which will

¹⁵ NPPF, Paragraph 71

¹⁶ PPG, Paragraph: 023 Reference ID: 3-023-20190722

continue to be a reliable source in the future, taking into account the proposed changes to the spatial strategy in the emerging plan.

4.16. The data on windfall completions covers the period 2011/12 to 2023/24 allowing us to use 13 years' worth of data, across the following categories:

- Years of dwelling completions
- Number of dwellings within each permission
- Greenfield / Brownfield
- Previous land use

4.17. The dwelling completion figures are net. We therefore factor in any losses or no net gain in dwellings to the calculations, for example in residential conversions or replacement dwellings.

STEP ONE: WINDFALL OVERVIEW

4.18. Our first step in the windfall analysis is to review the total number of windfall completions each year in the district as a proportion of total completions. This shows that windfall completions have ranged from between 15% to 100% of total completions.

4.19. The status of the development plan, the age of the plan, and housing land supply can influence the number of windfall units, so we have shown the status of both on table 3.

Table 3: All net windfall completions 2011/12 to 2023/24					
Year	Total Net Windfall Completions	Total Completions	Windfall as a %	5YHLS Yes or No?	Status of development plan
2011/12	346	346	100%	No	2011 Local Plan out of date
2012/13	270	270	100%	No	2011 Local Plan out of date
2013/14	570	586	97%	No	2011 Local Plan out of date
2014/15	680	739	92%	No	2011 Local Plan out of date
2015/16	960	1132	85%	No	2011 Local Plan out of date
2016/17	1221	1575	78%	Yes	Local Plan 2031 Part 1
2017/18	990	1556	64%	Yes	Local Plan 2031 Part 1
2018/19	599	1258	48%	Yes	Local Plan 2031 Part 1

Table 3: All net windfall completions 2011/12 to 2023/24

Year	Total Net Windfall Completions	Total Completions	Windfall as a %	5YHLS Yes or No?	Status of development plan
2019/20	702	1598	44%	Yes	Local Plan 2031 Part 1 & Local Plan 2031 Part 2
2020/21	544	1109	49%	Yes	Local Plan 2031 Part 1 & Local Plan 2031 Part 2

STEP TWO: MAJOR WINDFALL OVERVIEW

4.20. Next, we assessed how the total windfall completions (major sites) were split between Brownfield and Greenfield sites.

Table 4: Split between major Brownfield and Greenfield sites – net windfall completions

Year	Brownfield Land		Greenfield Land		Total
2011/12	227	66%	119	34%	346
2012/13	159	59%	111	41%	270
2013/14	405	71%	165	29%	570
2014/15	325	48%	355	52%	680
2015/16	273	28%	687	72%	960
2016/17	450	37%	771	63%	1221
2017/18	364	37%	626	63%	990
2018/19	282	47%	317	53%	599
2019/20	431	61%	271	39%	702
2020/21	319	59%	225	41%	544
2021/22	162	45%	200	55%	362
2022/23	146	41%	212	59%	358
2023/24	88	50%	88	50%	176
Total	3631	49%	3838	51%	7469
Average	279	49%	295	51%	608

4.21. Our analysis shows that supply of windfalls from Brownfield land was broadly consistent through the assessment period, contributing 279 dwellings on average between 2011/12 to 2023/24, and a total of 3,631 homes.

4.22. On Greenfield sites, since 2011/12 delivery has varied with significantly higher delivery in a number of years. This is likely to be the result of the Local Plan 2011 becoming out of date, and the land supply position falling below five years in the early years of the data period. Therefore, with the current position being that Vale of White Horse are able demonstrate a 5-year housing land supply position against current requirements, as well as against the emerging Plan requirements, it is likely supply from major Greenfield windfall developments will reduce and not form a consistent supply. As such, major Greenfield development sources have not been carried forward in the assessment.

STEP THREE: REVIEW OF PREVIOUS USE FOR MAJOR WINDFALLS

4.23. National policy states that windfall development should be a reliable source of housing supply. Therefore, it is important we understand where the supply of windfall has come from in the past. For example, has the supply been comprised of large one-off developments, or is it sourced from changes of use from one type of development that has slowly been exhausted over the years?

4.24. We have placed the previous land use of brownfield sites into five categories. We split the total windfall completions for each year into these categories to identify where windfall development has been occurring on a consistent basis.

Table 5: Net major windfall completions 2011/12 to 2023/24, Brownfield sites by previous land use						
Year	Commercial	Garden	Industrial	Office	Other	Residential
2011/12	0	0	9	10	194	0
2012/13	0	0	0	0	84	11
2013/14	0	21	1	24	289	10
2014/15	0	2	39	10	191	10
2015/16	0	18	31	0	52	121
2016/17	0	84	0	0	37	135
2017/18	0	0	0	10	137	47
2018/19	11	0	0	32	112	7
2019/20	154	7	0	14	112	49
2020/21	20	6	0	0	172	22
2021/22	8	3	33	12	73	35
2022/23	118	1	2	45	260	41
2023/24	35	1	0	6	16	30
Average	27	11	9	13	133	40

4.25. Table 6 shows that there has been consistent windfall development from the 'other' (e.g. Garden Centres, Police Station, Community Centre) and residential

previous land uses. We have therefore analysed these sources of supply in more detail in step four below.

4.26. The table above also shows that there has been inconsistent windfall completions on land previously used for: industrial, commercial, garden, and retail. We have removed these as a source of supply from the windfall assessment due to inconsistent delivery.

STEP FOUR – MAJOR WINDFALL ANALYSIS BY SITE SIZE

4.27. Next, we looked at the size of development contributing to the past levels of windfall within the ‘other’ and ‘office’ sources of supply that we carried forward from step three. We could then identify how consistent the supply was from the size ranges. The size groups were:

- Between 10 and 50 dwellings
- Between 51 and 100 dwellings
- Between 101+ dwellings

4.28. Table 6 shows the windfall completions from the sources ‘other’ and ‘residential’ taken forward from step three on sites of 10 to 50 dwellings. This shows that windfall completions on the previous land use category of ‘other’ and ‘residential’, of between 10 and 50 dwellings has been consistent, with an average of 32 homes and 19 homes delivered per annum respectively. Therefore, this provides a reliable supply and we have taken this forward as part of our assessment.

Table 6: Windfall on sites of 10-50 dwellings categorised as ‘other’ or ‘residential’		
Year	Other	Residential
2011/12	0	0
2012/13	24	11
2013/14	41	10
2014/15	21	10
2015/16	0	18
2016/17	9	95
2017/18	77	47
2018/19	50	7
2019/20	69	12
2020/21	111	22
2021/22	1	0
2022/23	0	0
2023/24	10	10
Total	413	242
Average	32	18

4.29. Table 7 shows the windfall completions from the sources 'other' and 'residential' taken forward from step three on sites of 50 to 100 dwellings. The supply is shown to be inconsistent here and has therefore not been taken forward into the overall windfall allowance.

Table 7: Windfall on sites of 50-100 dwellings categorised as 'other' or 'residential'		
Year	Other	Residential
2011/12	0	0
2012/13	0	0
2013/14	20	0
2014/15	97	0
2015/16	42	103
2016/17	25	40
2017/18	46	0
2018/19	3	0
2019/20	0	37
2020/21	0	0
2021/22	0	0
2022/23	0	8
2023/24	0	0
Total	233	188
Average	18	14

4.30. Table 8 shows the windfall completions from the sources 'other' and 'residential' taken forward from step three on sites of 101 or more dwellings. There is no recorded windfall supply from residential sites and so this does not need to be considered. For the 'other' category, there has been a consistent source of supply, however the amount delivered per annum has fluctuated fairly significantly. We have therefore decided to not include this in the windfall allowance.

Table 8: Windfall on sites of 50-100 dwellings categorised as 'other' or 'residential'		
Year	Other	Residential
2011/12	194	0
2012/13	60	0
2013/14	228	0
2014/15	73	0
2015/16	10	0
2016/17	3	0
2017/18	14	0

Table 8: Windfall on sites of 50-100 dwellings categorised as ‘other’ or ‘residential’

Year	Other	Residential
2018/19	59	0
2019/20	43	0
2020/21	61	0
2021/22	56	0
2022/23	250	0
2023/24	0	0
Total	1051	0
Average	81	0

4.31. Table 9 shows a summary of the windfall supply sources that we have carried forward from step four, and those that have been removed.

Table 9: Major windfall sites completions step four summary

Site Size	Commercial	Garden	Industrial	Office	Residential	Retail	Other
10-50 units	Excluded	Excluded	Excluded	Excluded	Included	Excluded	Included
51-100 units	Excluded	Excluded	Excluded	Excluded	Excluded	Excluded	Excluded
101+ units	Excluded	Excluded	Excluded	Excluded	Excluded	Excluded	Excluded

STEP FIVE: MINOR WINDFALL ANALYSIS

4.32. Finally, we examined windfall completions on sites of nine or fewer dwellings. Table 10 shows completions on minor sites between 2011/12 and 2023/24, the two-year rolling average of completions, and the average when the two highest and two lowest outliers are removed.

4.33. This shows that the averages are all similar; 154 completions on minor windfall sites, the two-year rolling average is 161 dwellings. The similarity in the averages shows the consistency of supply.

Table 10: Windfall completions on minor sites

Year	Total	2 year rolling average
2011/12	113	
2012/13	95	104
2013/14	107	101
2014/15	89	98
2015/16	185	137

Table 10: Windfall completions on minor sites

Year	Total	2 year rolling average
2016/17	404	295
2017/18	177	291
2018/19	177	177
2019/20	133	155
2020/21	126	130
2021/22	160	143
2022/23	129	145
2023/24	112	121
Total	2007	
Average	154	161

STEP SIX: TOTAL WINDFALL ALLOWANCE**Table 11: Windfall allowance totals**

Site size	Year 1	Year 2	Year 3	Year 4	Year 5
Major windfall allowance	0	0	0	50	50
Minor windfall allowance	0	0	0	154	154
Total windfall allowance	0	0	0	204	204
	Excluded	Excluded	Excluded	Included	Included

4.34. We will only include the windfall allowance years 4 and 5 as this would, in practice, avoid double counting with the Category A sites.

We expect 408 homes to be delivered on windfall sites during the five-year period.

Student Accommodation

4.35. The PPG advises that all student accommodation can be included towards meeting the housing requirement, based on the amount of accommodation it releases in the housing market.¹⁷

4.36. The calculation for this is based on the average number of students living in a student-only household, using the published 2011 Census data¹⁸ (as shown in Appendix E). For the Vale of White Horse the average number of students living

¹⁷ PPG, Paragraph: 034 Reference ID: 68-034-20190722

¹⁸ 2011 Census - Number of students in student only household.

www.ons.gov.uk/peoplepopulationandcommunity/housing/adhocs/008207ct07732011censusnumberofstudentsinstudentonlyhouseholdnationaltolocalauthoritylevel

in a student-only household is 1.7 (rounded to 1 decimal place). This means that for every 17 student units proposed this would contribute 10 dwellings towards our housing land supply. Comparable data has not been published as part of the 2021 Census, with PPG still linking to 2011 data. We will update our method in accordance with PPG once available.

- 4.37. The Housing Delivery Test uses the national average for the number of students living in student-only households. This may cause a slight difference in completion figures if compared against our more locally accurate figure for Vale of White Horse.

Residential Institutions

- 4.38. The PPG states that local planning authorities will need to count housing provided for older people including residential institutions in use class C2 against their housing requirement, based on the amount of accommodation released in the housing market¹⁹.
- 4.39. For residential institutions, the calculation is based on the average number of adults living in a household²⁰, using the published 2011 Census data²¹ (as shown in Appendix E). For the Vale of White Horse the average number of adults living in a household is 1.9 (rounded to 1 decimal place). Comparable data has not been published as part of the 2021 Census, with PPG still linking to 2011 data. We will update our method in accordance with PPG once available.
- 4.40. The Housing Delivery Test uses the national average for the number of adults living in households. This may cause a slight difference in completion figures if compared against our more locally accurate figure for South Oxfordshire.

Permitted Development

- 4.41. Permitted development rights are a national grant of planning permission under the General Permitted Development Order²² which allows certain building works and changes of use to be carried out without having to make a planning application.
- 4.42. Whilst in general there is no requirement for the developer to contact the Local Planning Authority to use permitted development rights, if the development involves the change of use, permitted development rights do require the developer to notify the local planning authority.
- 4.43. In some cases, a developer may need to seek Prior Approval which means local planning authority will need to approve that specified elements of the development are acceptable before work can proceed. The matters for Prior

¹⁹ PPG, Paragraph: 035 Reference ID: 68-035-20190722

²¹ 2011 Census - Age of Household Reference Person (HRP) by number of adults in household www.ons.gov.uk/peoplepopulationandcommunity/housing/adhocs/008208ct07742011censusageofhouseholdreferencepersonhrpbynumberofadultsinhouseholdnationaltoauthoritylevel

²² The Town and Country Planning (General Permitted Development) (England) Order 2015 www.legislation.gov.uk/uksi/2015/596/contents/made

Approval vary depending on the type of development and these are set out in full in the relevant Parts in Schedule 2 to the General Permitted Development Order.

4.44. Where a permitted development is a change of use, under the regulations change of use must occur within three years of the Prior Approval being granted. It is therefore included in the housing supply and assumed to be deliverable. Other forms of Prior Approvals will be included, as they in essence have full permission, as long as there is no evidence to say that they will not come forward.

Supply of deliverable sites

4.45. Table 12 provides the breakdown of deliverable sites for the period 2024 to 2029.

Table 12: Supply of deliverable sites	
Housing supply components	Housing supply 2022-2027
Category A sites	2,854
Category B sites	2,526
Windfall allowance <i>(Only applying in years 2027/28 and 2028/29)</i>	408
Total	5,788

5. FIVE YEAR LAND SUPPLY POSITION

5.1. The council's five-year housing land supply position, as shown in Table 13, is 5.58 years.

Table 13: Five-year housing land supply calculation			
Step		Result	Notes
A	5 Year Housing Requirement	4,080	See Table 3
B	Housing supply	5,788	See Table 14
C	Number of years' deliverable supply	7.09	(B / A) x 5
D	Over / under supply	+1,708	B - A

Assessment of deliverability

1. Current planning status

The site is allocated in the Vale of White Horse Local Plan 2031 and benefits from an outline permission for 4,254 homes. The site now has detailed permission for 418 homes, with two further reserved matters application under consideration for 435 homes. There are also two reserved matters applications under consideration relating to infrastructure provision.

2. Technical consultee comments

The below list identifies where technical stakeholders have provided feedback on the proposed development, along with steps the council or applicant are taking to address them. We have graded these as follows:

Identifies a serious technical objection with no plan in place to address this

-  Identifies a serious technical objection with a plan in place to address this
-  Identifies no objections to the development
-  Identifies pre-commencement conditions
-  Identifies key consultee yet to respond

P24/V0470/RM –Taylor Wimpey Parcel 2 / Phase 2Tb - 284 homes

Ecology (8 October 2024)

Objection

There are issues relating to hedgerows and the road layout affecting watercourses.

Drainage Engineer (11 October 2024)

No objection

Forestry Officer (11 October 2024)

Concerns raised in relation to tree species and variety, and integration of new trees within hard surfaced areas. Conflicts with tree planting locations and drainage scheme.

Env. Protection Team (15 March 2024)

No objection

Housing Development (10 September 2024)

Holding objection

- Affordable housing numbers proposed differ from those agreed in Housing Mix Update (HMU).
- Tenure mix requires amending.
- Unit types require amending.

Landscape Architect (1 October 2024)

- The majority of landscape issues have been addressed in these amendments; the remaining issues could be addressed by Standard Landscape Conditions as they would have limited impact on the site layout.

 **Environment Agency**

No objections

 **Oxfordshire County Council (21 October 2024)**

Transport – No objection

Lead Local Flood Authority – No objection

Archaeology – No objection

Estates – No objection

 **Thames Valley Police (2 October 2024)**

Objection. Key issues relate to surveillance, defensible space between public and private realm and security

 **Thames Water (13 August 2024)**

No objection

 **Urban Design Officer (10 October 2024)**

Having reviewed the layout against the Strategic Design Code, there are still some outstanding design issues that would need resolving. These relate to heights of building, design of corner plots, parking solutions and street trees.

 **Waste Management Officer (3 October 2024)**

No objection

 **Active Travel (10 April 2024)**

Conditional approval

ATE recommends approval of the application, subject to the agreement and implementation of planning conditions

P24/V0733/RM –Persimmon Parcel 2 / Phase 1Pa- 151 homes

 **Ecology (8 October 2024)**

No objection

I would recommend to the case officer that the formation of this breach in the northern hedgerow should be resisted, as the hedgerow in question is identified for retention in the outline approved plan. If a gap is created, this would likely become a regularly used, but not formalised access point.

- BEP: Amended BEP is acceptable.
- Watercourse Buffer Zone: Amended document is acceptable.

 **Drainage Engineer (27 September 2024)**

No objection

 **Forestry Officer (7 June 2024)**

No objection subject to condition

 **Contaminated Land (22 April 2024)**

No objection

 **Env. Protection Team (16 April 2024)**

No objection

 **Housing Development (10 May 2024)**

. No objection

 **Landscape Architect (30 August 2024)**

No objection

 **Oxfordshire County Council (4 June 2024)**

Transport – No objection

Lead Local Flood Authority – No objection

Education - No objection

Archaeology - No objection

 **Thames Valley Policy (1 May 2024)**

Key concerns with regards to surveillance and defensible space between public and private realm.

 **Thames Water (24 April 2024)**

No objection

 **Urban Design Officer (3 September 2024)**

Concerns regarding garden sizes and street scenes.

 **Waste Management Officer**

No comments received

 **Active Travel (6 September 2024)**

No objection subject to conditions

3. Site viability

The Council and site promoter are not currently aware of any viability issues affecting this site.

4. Ownership constraints

The Council is not aware of any land ownership constraints affecting development.

5. Infrastructure dependencies and enablers

The infrastructure requirements and phasing of delivery can be found in the Phasing Plan provided as part of [P22/V2407/DIS](#).

6a. Site promoter comments (Taylor Wimpey)

Taylor Wimpey Parcel 1: 246 homes (P22/V2744/RM)

1. How many homes have you completed on this parcel to date (if any)?

P24/V0470/RM - Taylor Wimpey Parcel 2 / Phase 2Tb - 284 homes

2. When do you expect to submit amended plans or documents to address comments by:

- Ecology Officer
- Forestry Officer
- Thames Valley Police
- Urban Design Officer

3. What do you think are the key issues that need to be resolved before the council issues planning permission for the reserved matters application P24/V0470/RM?

4. When do you think construction work will commence on this parcel, and are there any obstacles to starting construction?

5. When do you think the first dwelling will be completed on this parcel?

P14/V2873/O – Overall outline application covering the whole site

1. Is the table you provided as part of your last 5-year land supply submission still an accurate reflection of when you expect to submit reserved matters applications for future phases?

Taylor Wimpey expected chronological order of Residential reserved matters planning application and commencement of development (<i>submitted for previous 5 year land supply statement</i>)		
Parcel no.	Planning Submission	Commencement
1T	Nov-22	2024
2TB	Nov-23	2024
2TA	2024	2025
6T	2024	2025
2TC	2025	2026
6TA	2027	2027
6TB	2027	2028
4TA	2026	2027
4T	2028	2030
6TC	2030	2031

XTP	2033	2035
-----	------	------

- Do you still anticipate that there will be two Taylor Wimpey sales outlets – with one sales outlet in place from commencement, and a second opening in 2026 running alongside the first.
- The council believes that the phasing plan agreed under P22/V2407/DIS (see below) is no longer accurate as no homes were completed on this site in 2023. However, good progress has been made on securing detailed permission, and the councils assume the phasing plan remains robust from 2026/27. We have suggested amendments for the early years based on the likely lead in times and build out rates for the permitted / live reserved matters applications. We have provided an excel spreadsheet showing the breakdown between the RM applications and the assumed supply from the rest of the outline application. This is reflected in the council's assumed trajectory for the site in table 9a below. Please provide your thoughts on this approach (we have provided table 10a at the end of this proforma for you to add your own trajectory).

20	80	100	100	100	400

7. Officer conclusion on deliverability

The site is allocated in the Vale of White Horse Local Plan 2031. The Council granted outline permission February 2022 for 4,254 homes. Currently there are two developers on site: Persimmon Homes and Taylor Wimpey. This proforma identifies the projected supply across the entire site from both developers.

Taylor Wimpey Parcel 1: 246 homes (P22/V2744/RM)

The site is currently under construction. Access works are now complete. There are currently 246 homes with detailed permission that Taylor Wimpey are yet to complete from this permission. These homes fall within "Category A" for defining a deliverable housing supply because they have detailed planning permission. In line with national policies and guidance, the council therefore considers these homes to be deliverable.

Taylor Wimpey Parcel 2 / Phase 2Tb: 284 homes (P24/V0470/RM)

Taylor Wimpey submitted this reserved matters planning application in February 2024, and the Council is still considering this. There are outstanding objections or comments from 8 technical specialists. However, the nature of these comments requires minor alterations rather than wholesale reworking of the submitted application. Most of the comments from technical officers' state they are generally happy with the submitted material.

The council considers that these homes will receive permission and build out in the 5-year period, as shown on the permissions breakdown at the end of this proforma.

Persimmon Parcel 1: 172 homes (P23/V0667/RM)

The site is currently under construction. Access works are now complete. There are currently 2172 homes with detailed permission that Persimmon are yet to complete from this permission. These homes fall within "Category A" for defining a deliverable housing supply because they have detailed planning permission. In line with national policies and guidance, the council therefore considers these homes to be deliverable.

The council and Persimmon agree the phasing plan remains robust from 2026/27. Both parties agree that the phasing plan needs amendments for the early years based on the likely lead in times and build out rates for the permitted / live reserved matters applications. This is shown on the permissions breakdown at the end of this proforma.

Persimmon Parcel 2 / Phase 1PA: 151 homes (P24/V0733/RM)

Persimmon submitted this reserved matters planning application in March 2024, and the Council is still considering this. There are outstanding objections or comments from 7 technical specialists. However, the nature of these comments requires minor alterations rather than wholesale reworking of the submitted application. Most of the comments from technical officers' state they are generally happy with the submitted material.

The council considers that these homes will receive permission and build out in the 5-year period, as shown on the permissions breakdown at the end of this proforma.

Homes coming forward as part of the outline consent without live reserved matters applications

We have received a response from Persimmon Homes indicating their expected build out trajectory of 100 homes per annum 2026/27. The agreed and submitted reserved matters will provide housing supply until 2028/29 if following this trajectory, with the last 23 homes from P24/V0733/RM, which is currently under consideration, anticipated to be delivered. This gives circa 4 years to agree further reserved matters applications, which gives an abundant amount of time taking into account on average it takes 10 months to agree a reserved matters for applications of between 100 to 499 units. We consider that the delivery trajectory is likely to actually deliver in excess of 100 homes per annum, though this may be supported by different developer outlets on site, as was seen on the adjacent site Great Western Park. At this time though we are relying on the developer anticipated build out rate.

Taylor Wimpey have not provided any delivery information. We have therefore relied upon the housing trajectory set out in the Housing Delivery Document provided as part of the discharge of conditions application, P22/V2407/DIS. EW have adjusted the trajectory to take account of the delay in initial delivery of homes.

We consider taking into account the above there is clear evidence of a realistic prospect that across the site 1,073 units will be delivered in the five year period.

8. Signatures

On behalf of Vale of White Horse District Council, I consider this to be a realistic assessment of the trajectory for this site.

Assessment of deliverability

1. Current planning status

Grove Airfield was allocated in the Vale of White Horse's Local Plan 2011 and carried forward into the Local Plan 2031. The allocation is for 2500 dwellings. The site was granted outline permission in July 2017 since which a number of reserved matters have been submitted and approved. Construction has commenced on the site and the first homes were delivered in 2018/19. As of the 31 March 2024, 702 homes have been built.

There are currently 343 homes with detailed permission that have yet to be built on site. There are 3 reserved matters applications under consideration for site infrastructure (P22/V2879/RM, P23/V1966/RM and P23/V2702/RM). There is 1 reserved matters application under consideration for 152 dwellings (P24/V1525/RM)

A pre-application enquiry has recently been submitted for a further 224 dwellings (P24/V1505/PEJ), and a planning application is expected to be submitted by the end of 2024, start of 2025.

2. Technical consultee comments

The below list identifies where technical stakeholders have provided feedback on the proposed development, along with steps the council or applicant are taking to address them. We have graded these as follows:

-  Identifies a serious technical objection with no plan in place to address this
-  Identifies a serious technical objection with a plan in place to address this
-  Identifies no objections to the development
-  Identifies pre-commencement conditions
-  Identifies key consultee yet to respond

P24/V1525/RM – 152 homes

 **Ecology Team (10/09/2024)**

Holding objection: more information needed.

The update ecological survey is acceptable and I agree with its conclusions. However, there are a number of issues or omissions with the LEMP and CEMP documents. These typically affect the usability of the documents for contractors on the ground and therefore it is important that they are amended before determination of the reserved matters application.

 **Forestry Officer (23/08/2024)**

Tree protection fencing will be required to safeguard trees in this part of the site for the duration of phase 7. A Tree Protection Plan will be required for this part of the site before any works take place.

 **Air Quality (14/08/2024)**

No objection

 **Contaminated Land (29/07/2024)**

No objection

 **Env. Protection Team (22/07/2024)**

No objection

 **Housing Development (20/08/2024)**

It is advised and preferred that all affordable housing units are delivered to conform with the Nationally Described Space Standards (NDSS).

The submitted Parking Strategy (drawing no. 24628-4008 Rev C), however, does not appear to allocate parking spaces to each individual unit. All parking spaces on land that is to be transferred to the Registered Provider should be allocated to the individual affordable units and not marked as 'unallocated'. It is advised the applicant clarifies whether the submitted Planning Layout Final accurately reflects their allocated parking proposals.

 **Landscape Architect (09/08/2024)**

Holding objection

Currently the quality of the design does not reflect the expectations of Local Plan Policies 37, 38 and 44 of the Local Plan with regards to the quality of the proposed hard and soft planting details.

 **Oxfordshire County Council – Transport (04/09/2024)**

Holding objection

- Amendments and further information required in regard to visibility splays.
- The submitted Planning Layout drawing (contained under drawing number, 24628/5000R) shows 4 connection points that tie into the adjacent linear park to the east of the development site. It is requested that the connection points are flared in order to ensure that sufficient pedestrian visibility of 2m x 2m into the development site is achieved. This should be demonstrated.
- Whilst a parking strategy drawing has been provided (contained under drawing number 24628/4008 rev C), the submitted detail is not sufficient in establishing parking suitability.
- It is not clear whether cycle parking is sufficient for each plot as no parking schedule has been provided. This should be submitted for consideration.
- The submitted Residential Travel Plan requires some additional information before it meets OCC criteria.

 **Oxfordshire County Council – Local Lead Flood Authority (04/09/2024)**

No objection

 **Oxfordshire County Council – Archaeology (04/09/2024)**

No objection

 **Designing out crime**

No objection, subject to conditions.

 **Thames Water**

No objection

 **Urban Design (04/09/2024)**

Main concerns from a design point of view are as follows:

- The central green corridor proposed needs to be further emphasised via the provision of rich vegetation and tree planting in order to fulfil the wide range of benefits that these can provide.
- Boundaries need to be carefully considered throughout the masterplan. It would be helpful to submit a plan showing details of boundary treatments alone, differentiating these in different colours and including low level planting.
- The interface with Newlands Drive needs to be clarified beyond the red line plan, particularly around the left-over green verges.
- In terms of materials, the contrast between terracotta roof tile and buff brick can at times clash, so I would welcome to see samples of these on site if at all possible, to be satisfied that these would work well together.
- Overall, there is over reliance of frontal on plot parking.
- Provide a picture of what a screen wall with trellis would look like in occasions this type of boundary will be terminating a vista so I need to understand what it would look like in reality.
- I remain to be convinced that the grass verges in between private drives are necessary.

 **Waste Management Officer**

No objection

 **Active Travel**

Standing advice issued.

3. Site viability

The Council and site promoter are not aware of any viability issues affecting this site.

4. Ownership constraints

The Council is not aware of any land ownership constraints affecting development.

5. Infrastructure dependencies and enablers

Please see appended phasing plan.

6. Site promoter comments

P24/V1525/RM:

1. When do you expect to submit amended plans or documents to address comments by specialist officers?
These have been submitted.
2. What do you think are the key issues that need to be resolved before the council issues planning permission?
Landscaping

P12/V0299/O:

3. Please provide a timetable forecasting when you will submit reserved matters application/s on this site? (If the site will be brought forward in multiple reserved matters phases, please provide a timetable for these for the next 5 years)
4. How many sales outlets are on site?
5. How many homes a year do you think this site will deliver?

<i>2024/25</i>	<i>2025/26</i>	<i>2026/27</i>	<i>2027/28</i>	<i>2028/29</i>	<i>5-year total</i>
<i>100</i>	<i>100</i>	<i>100</i>	<i>100</i>	<i>100</i>	<i>500</i>

6. Are there any other comments you would like to raise?

7. Officer conclusion on deliverability

Grove Airfield, a housing allocation in the Vale of White Horse Local Plan, has been delivering homes since 2018/19. As of the 31 March 2024, 702 homes have been built.

There are currently 343 homes with detailed permission that have yet to be built on site. There are 3 reserved matters applications under consideration for site infrastructure (P22/V2879/RM, P23/V1966/RM and P23/V2702/RM). There is 1 reserved matters application under consideration for 152 dwellings (P24/V1525/RM). A pre-application enquiry has recently been submitted for a further 224 dwellings (P24/V1505/PEJ), and a planning application is expected to be submitted by the end of 2024, start of 2025.

The developer has provided their projected build out trajectory of 100 homes per annum. This seems very realistic taking into account the site has delivered 117 homes per annum on average so far, including the initial start up year. Taking this

trajectory we would expect the 343 homes that currently have detailed permission to be built out by mid-2027/28. This gives 3 years for further reserved matters to be agreed and construction to start. There is currently a reserved matters application for 152 homes under consideration, which was submitted in July 2024. On average for Reserved Matters application of over 100 homes it takes just over 10 months for the application to be agreed. The 3 year lead in time is therefore more than sufficient for further reserved matters to be agreed. A further application for 224 dwellings is also expected to be submitted by early 2025.

We expect 157 homes to come forward on parcels of the site that do not currently have detailed permission, and therefore fall under part 'b' of the definition of deliverable. We consider there to be clear evidence of a realistic prospect these will be delivered in the five year period. This takes into account the site is currently under construction, there are further reserved matters application under consideration, the developer has provided their intention in regard to further reserved matters submission and build out rates and having regard to general trends of delivery within the district.

8. Signatures

On behalf of Vale of White Horse District Council, I consider this to be a realistic assessment of the trajectory for this site

Assessment of deliverability

1. Current planning status

This site benefits from an allocation in the Vale of White Horse Local Plan 2031. Outline permission was granted in July 2015 for 1,500 homes. Currently there are 1,053 homes with detailed permission. A number of reserved matters applications have been submitted and permitted since, and work has commenced on site with 750 homes delivered up to 31 March 2024.

In November 2023 a further outline permission was granted permission, which optimised part of the land uses on site. This has led to an additional 34 units with outline permission above the 1,500 units previously expected.

2. Technical consultee comments

The below list identifies where technical stakeholders have provided feedback on the proposed development, along with steps the council or applicant are taking to address them. We have graded these as follows:

-  Identifies a serious technical objection with no plan in place to address this
-  Identifies a serious technical objection with a plan in place to address this
-  Identifies no objections to the development
-  Identifies pre-commencement conditions
-  Identifies key consultee yet to respond

There are several Reserved Matters applications currently under consideration, though not for residential uses.

3. Site viability

The Council and site promoter are not aware of any viability issues affecting this site.

4. Ownership constraints

The Council is not aware of any land ownership constraints affecting development.

5. Infrastructure dependencies and enablers

The main infrastructure requirements were agreed through the S106 legal document supporting the original planning permission, [P13/V1764/O](#). There are no significant changes to this.

6. Site promoter comments

1. Please provide a timetable forecasting when you will submit reserved matters application/s on this site? (If the site will be brought forward in multiple reserved matters phases, please provide a timetable for these for the next 5 years)
2. When do you think construction work will commence, and are there any obstacles to starting construction?
3. How many sales outlets are on site, and will these be present at the same time or in separate phases?

3 developers will be on site. St Modwen, Vistry and Bovis.

4. How many homes a year do you think this site will deliver?

Vistry – 88 in 2025 and 27 in 2026 on the Central Phase.

5. Are there any other comments you would like to raise?

Vistry is developing Grove Road East, Bovis Central and St Modwen Northeast. The eastern section of Southwest is currently on the market.

It is expected that the development will reach 700 occupations during November.

7. Officer conclusion on deliverability

The site is allocated in Vale of White Horse Local Plan 2031 for 1,500 dwellings. Outline permission was granted in July 2015 for 1,500 dwellings and the first reserved matters approved in November 2017. The first homes were delivered in 2018/19 and the site has averaged delivery of 125 homes per annum since.

In November 2023 a further outline permission was granted on the site. This replanned the western area of the site and the outline permission was for 669 homes, which led to an overall increase of 34 dwellings from what had been originally permitted. In addition to the C3 residential units permitted through the two outline applications, which total 1,534 units, a 72 bed care homes has also been permitted and delivered. The care home units have been counted towards

the housing supply with a ratio applied, to represent the number of homes expected to be released in the housing market from residents moving into the care home. Applying the ratio, 38 homes are calculated to count towards housing supply. In addition, one additional home has been built on site through the redevelopment of a barn on site. In total, we expect the site to contribute 1,573 units towards the housing supply. 750 of these units have been completed as of April 2024, leaving 823 to come forward.

There are currently 3 reserved matters permissions for parcels of land on the site that have not been completed. These are P22/V1910/RM (Northeast parcel), P21/V1265/RM (Southeast B parcel), and P24/V0261/RM (Central parcel). A total of 269 homes are remaining to be delivered from these permissions (more detail can be found on the accompanying phasing plan). In addition, a reserved matters permission is currently under consideration for 116 homes on the Grove Road (East Phase). There are currently 3 outlets on site or expected to be on site soon, these are St Modwen, Vistry and Bovis (owned by Vistry). The phasing plan provided as part of the recent outline application, below, sets out the expected trajectory for the site. The agent for the site has confirmed that the trajectory is on track with 700 occupations expected by November 2024¹. The Southwest parcel is currently being marketed, as confirmed by the agent.

¹ It should be noted that the completion figure and occupation figure will not match. This is due to a different method being used to assess the number of housing completions on site.

The trajectory for the site has been developed taking into account the historic completion rate on site, the number of outlets, the phasing plan provided by the master developer, and the recent information provided by the developers on site. The accompanying phasing plan sets out the trajectory by phase, showing that we expect **635 units to be delivered in the 5-year period**.

Of the 635 units:

- 269 units have detailed permission.
- 116 units are under consideration through reserved matters application P24/V1882/RM, Grove Road (East).
- 130 units from the Southwest Parcel which is currently being marketed to housebuilders and will required a reserved matters permission. The first homes are expected towards the end of 2026/27. Giving over 2 years for the land to be sold and reserved matters agreed.
- 90 homes from Grove Road (West), with the first homes expected in 2027/28.

There is clear evidence of a realistic prospect that the 366 homes expected to be delivered in the 5-year period that do not have detailed permission, will come forward as expected.

8. Signatures

On behalf of Vale of White Horse District Council, I consider this to be a realistic assessment of the trajectory for this site

Assessment of deliverability

1. Current planning status

The Council allocated this site for 885 homes in the Vale of White Horse Local Plan: Part 1.

The Council has granted four outline planning permissions on this site, totalling 768 dwellings. All of the outline consents have since been supported by Reserved Matters consents and have been built out or are building out. This takes the total completions on site to 392. This leaves 149 units with detailed permission that are yet to be built out, with 237 units having outline permission. On top of this, there is still capacity for 117 units to receive planning permission against the allocation of 885 units.

The Council has granted permission for reserved matters applications from David Wilson Homes for 163 units (P21/V3516/RM and P24/V0427/RM) under the outline consent for 400 homes (P16/V0981/O). The Council is also considering a reserved matters application from David Wilson Homes for Phase 1A of the outline application (P22/V1031/RM). This does not include residential units but does include enabling infrastructure such as access and SUDS / Open space for the 400 units outline consent. The Council has approved a reserved matters application for a new multiuse games area for the existing primary school and new school playing fields under P22/V1020/RM.

2. Technical consultee comments

The below list identifies where technical stakeholders have provided feedback on the proposed development, along with steps the council or applicant are taking to address them. We have graded these as follows:

-  Identifies a serious technical objection with no plan in place to address this
-  Identifies a serious technical objection with a plan in place to address this
-  Identifies no objections to the development
-  Identifies pre-commencement conditions
-  Identifies key consultee yet to respond

Currently there are no residential applications that are undetermined.

3. Site viability

At present, DWH are engaging with the LPA and Housing Officer in regard to the affordable housing within Phase 1B. We have tendered the affordable housing and received no proceedable/viable offers and are working with the LPA to resolve.

4. Ownership constraints

There are no known ownership constraints.

5. Infrastructure dependencies and enablers

A significant section of the allocation has been completed. The outline permission for 400 homes (P16/V0981/O) has agreed infrastructure contributions through an S106 agreement, with a key infrastructure piece being the delivery of a section of the Grove Northern Link Road.

6. Site promoter comments

P16/V0981/O:

1. Please provide a timetable forecasting when you will submit reserved matters application/s on this site? (If the site will be brought forward in

multiple reserved matters phases, please provide a timetable for these for the next 5 years)

- *Phase 2B – January 25*
- *Phase 3 – August 25*

2. Are there any site wide conditions that need to be satisfied before a reserved matters application can be approved (e.g. a design code, phasing plan, CEMP etc), and what measures are being taken to ensure they can be satisfied?

- *None before RM can be approved.*

3. When do you think construction work will commence, and are there any obstacles to starting construction?

- *Date of commencement: 13/07/2023.*
- *Commencement has started for first 55 units. Potential obstacle to further development post-55 dwellings is timing of further RM planning permissions, archaeology works, bridge design and works, seasonal ecology works, EA licence, and mobilisation and construction works.*

4. When do you think the first dwelling will be completed?

- *First occupation was 12 July 2024.*

5. How many sales outlets will be on site, and will these be present at the same time or in separate phases?

- *Two at the same time (David Wilson Homes and Barratt Homes).*

6. How many homes a year do you think this site will deliver?

- *50 in total per annum - subject to bridge consents/condition, and market conditions.*

7. Are there any other comments you would like to raise?

- *N/A*

7. Officer conclusion on deliverability

The Council has allocated this site for 885 homes in the Vale of White Horse Local Plan: Part 1. The Council has granted four outline planning permissions on this site, totalling 768 dwellings. All of the outline consents have since been supported by Reserved Matters consents and have been built out or are building out. The Council has granted permission for reserved matters applications from David Wilson Homes for 163 units (P21/V3516/RM and P24/V0427/RM) under the outline consent for 400 homes (P16/V0981/O) and is also considering a reserved matters application from David Wilson Homes for Phase 1A of the outline application (P22/V1031/RM), which includes enabling infrastructure such as access and SUDS / Open space for the 400 units outline consent.

The Developer has indicated that subsequent reserved matters applications for phases 2B and 3 are expected in January 2025 and August 2025 respectively.

Looking at district average lead in times for sites of this size, on average they take 1.9 years from the submission of a reserved matters application to first completion.

The developer indicates through the housing delivery trajectory, that construction on the wider site has already started, with commencement of the first 55 units. However, the developer also indicates that archaeology works, bridge design and works, seasonal ecology works, EA licence, and mobilisation and construction works related to the reserved matters application (P21/V3516/RM and P24/V0427/RM) under the outline consent for 400 homes (P16/V0981/O), may be a potential obstacle to further development post-55 dwellings. This will be monitored when the RM applications are submitted and the impact on the housing delivery trajectory. The average build out rate for a site of this size is 46 homes per annum. The developer has indicated that there will be two outlets on this development and this is reflected in the housing trajectory at 50 dwellings per annum.

The site is allocated in the Vale of White Horse Local Plan: Part 1. The Council has granted four outline planning permissions on this site, totalling 768 dwellings. All outline consents have since been supported by Reserved Matters consents and have been built out or are building out. The data we have produced to illustrate average lead in times and build out rates for housing developments in the district indicate that it takes 1.9 years from the submission of a reserved matters application to first completion. The progress underway on the site and our district specific data demonstrate clear evidence that there is a realistic prospect of housing units being delivered within 5 years, and we have assumed 250 units will come forward in the 5-year period.

Assessment of deliverability

1. Current planning status

The site is allocated for 800 dwellings by Core Policy 4 of the Vale of White Horse Local Plan 2031 Part 1.

There are no current planning applications for housing development on this site.

2. Technical consultee comments

We have not received any technical comments on this site as the site promoter has not yet submitted a planning application.

The below list identifies where technical stakeholders have provided feedback on the proposed development (P21/V2342/O), along with steps the council or applicant are taking to address them. We have graded these as follows:

-  Identifies a serious technical objection with no plan in place to address this
-  Identifies a serious technical objection with a plan in place to address this
-  Identifies no objections to the development
-  Identifies pre-commencement conditions
-  Identifies key consultee yet to respond

3. Site viability

The Council and site promoter are not aware of any viability issues affecting this site.

4. Ownership constraints

The Council is not aware of any land ownership constraints affecting development.

5. Infrastructure dependencies and enablers

Key infrastructure requirements for North West Valley Park, taken from the update IDP, include:

- Either a new GP surgery, or expansion of existing GP surgeries nearby in Didcot
- New and expanded education capacity including:
 - Contributions toward primary school provision (including early years provision) on the neighbouring Valley Park development (which

already has planning permission and is building out). However, Oxfordshire County Council has advised that if these schools do not have capacity, North West Valley Park will need to provide its own primary school, and hence the JLP safeguards land for a one form entry primary school;

- Financial contributions towards the new secondary school on the Didcot Northeast development in South Oxfordshire; and
- Contributions toward special educational needs capacity.
- New transport infrastructure, including:
 - High quality on and off-site cycle and walking routes;
 - Pump priming and funding of scheduled bus services, likely to be routes to Didcot Town Centre and Railway Station, and other key destinations, including major employment sites at Culham Campus, Harwell Campus, and Milton Park; o Contributions towards Housing Infrastructure Fund (HIF) 1 infrastructure, including widening of the A4130, Great Western Railway bridge crossing at Didcot, Didcot to Culham river crossing, and the Clifton Hampden bypass; and
 - Direct delivery of, or financial contributions toward other highways improvements.
- New green infrastructure and open space, amounting to around 5.32ha of open and green space, 0.71ha of community food growing space (such as allotments), and 0.97ha of child's play and space for teenagers.
- New sport and leisure provision amounting to:
 - Financial contributions towards improving swimming pool, sports hall, and indoor bowls provision; and
 - Financial contributions toward delivering off site football, cricket, and rugby pitches.
- The delivery of new and improved high quality public realm.
- Improvements to Didcot Sewage Treatment works, as well as improvements to the sewerage system network and water supply network.

6. Site promoter comments

1. What site surveys, studies, and other due diligence measures have you undertaken in support of this site?

Master Plan and Transport Proposals prepared (necessary site surveys for these purposes having been undertaken).

2. What pre-application advice have you sought from this council, or other important consultees such as Oxfordshire County Council / other infrastructure providers?

Discussions have been held previously with various Council representatives and Homes England. A planning partner is currently being engaged.

3. What public consultation have you undertaken to date, and please can you provide any documents or links to websites showing this?

No public consultations have yet been undertaken. Application process at early stage.

4. When do you intend to submit a planning application for this site? Will this be outline, full, or hybrid?
Likely to be outline with part hybrid.
5. When do you think construction work will commence, and are there any obstacles to starting construction?
At present 2027/28. No obstacles known
6. When do you think the first dwelling will be completed?
At present 2028/29 to tie in with the anticipated construction start date. Both of these will depend upon progress as with all sites through the planning process.
7. How many sales outlets will be on site, and will these be present at the same time or in separate phases?
Yet to be determined, but probably two.
8. How many homes a year do you think this site will deliver?
At present 120 (see table below)
9. Are there any other comments you would like to raise?
The formal planning application process is only just commencing and is expected to run its normal course.

Total unit numbers based upon Council's assessment for purposes of these responses.

7. Officer conclusion on deliverability

The site is allocated for 800 dwellings by Core Policy 4 of the Vale of White Horse Local Plan 2031 Part 1, with no planning application submitted to date. However, the Planning Consultant has indicated that site surveys have been undertaken as part of masterplanning and transport proposals for the site, pre-application advice has been sought and a planning partner is being engaged, which provides evidence that preparation for a planning application is in development.

Looking at district average lead in times for sites of this size, on average they take 6.8 years from the submission of an outline application to first completion, with 4.4 year being the average from submission of an outline application to outline consent being granted. The Planning Consultant has indicated that subject to the submission of a successful outline or part hybrid planning application, construction will commence in 2027/28. At present there are no known obstacles to construction on site. The trajectory for housing delivery on the site recognises swifter delivery than district averages, with 60 homes expected to deliver in 2028/29. The Planning Consultant has indicated that it is most likely that two

outlets will deliver the units on site, although this will be confirmed through the submission of the planning application. The average build out rate for a site of this size is 133 homes per annum. 60 completions in 2028/29 represents less than half of the average annual build out rate. Build out rates beyond the five-year period will broadly conform to the average for sites of similar size as the development establishes.

The site is allocated for 800 dwellings by Core Policy 4 of the Vale of White Horse Local Plan 2031 Part 1 and the Planning Consultant has provided evidence that preparation for a planning application is in development. The data we have produced to illustrate average lead in times and build out rates for housing developments in the district indicate that it takes 6.8 years from outline permission being granted to the first housing completion and at present we do not consider there to be sufficient evidence to depart significantly from this. Whilst the site promoter has provided information as to preparatory work completed so far and expected construction and first completion dates, no indication has been provided as to when a planning application will be submitted. Assuming an outline application is made in 2025/26, we consider it ambitious that the relevant permissions and discharge of conditions would have been achieved for construction to commence in 2027/28. 2 years after the submission of an application. Though it is also important to note that there is nothing to prevent the site coming forward as anticipated by the site promoter, other than the successful granting of permissions.

Given the early stage of the site in the planning process, we consider it appropriate to rely more heavily on the district's average lead in times. If we assume an application is made in 2025/26, then we might expect the first completions in 2031/32, around 6.5 years after a potential application is submitted. We have assumed half a years build out rate in 2031/32 of 60 homes, and 120 homes per annum following that in accordance with the site promoters expectations.

No homes are projected to be delivered in the 5-year period.

Assessment of deliverability

1. Current planning status

The applicant, Pye Homes, submitted a full application for 64 dwellings in 2019, but withdrew this application on 3 April 2020. The applicant withdrew this application to enable them to respond to the comments made by consultees. Pye Homes then submitted a new full application on 5 February 2021 for “phase 1” of the development for 50 units. This has subsequently been revised down to 45 units due to amended plans, 15 of which will be affordable dwellings. The applicant will submit a separate application for Phase 2.

Pye Homes has been working with the Council to ensure that key consultee comments are addressed, submitted revised plans or additional information throughout 2021 and 2022. On the 11 May 2022 the application was put to Planning Committee and a resolution to grant approval, subject to approval of a S106 agreement, was granted. The legal agreement is currently being finalised.

2. Technical consultee comments

The below list identifies where technical stakeholders have provided feedback on the proposed development, along with steps the council or applicant are taking to address them. We have graded these as follows:

-  Identifies a serious technical objection with no plan in place to address this
-  Identifies a serious technical objection with a plan in place to address this
-  Identifies no objections to the development
-  Identifies pre-commencement conditions
-  Identifies key consultee yet to respond

Resolution to Grant Committee (11/05/2022)

The resolution to grant permission at Committee identified the following pre-commencement conditions that will be attached to the consent:

- 1) Biodiversity - No development shall commence unless and until a certificate confirming the agreement of an Offsetting Provider to deliver a Biodiversity Offsetting Scheme totalling a minimum of 5.46 biodiversity units has been submitted to and agreed in writing by the Local Planning Authority.
- 2) Drainage - No development shall commence until a detailed sustainable drainage scheme has been submitted to and approved in writing by the local planning authority. This shall be based on

drainage strategy drawing ASH ICS P1 XX DR C 0200 rev P08, a minimum buffer between peak monitored groundwater levels and finished floor levels as outlined in Infrastructure's Groundwater Assessment dated 25th January 2022, sustainable drainage principles and an assessment of the hydrological and hydrogeological context of the development.

- 3) Drainage - - No development shall commence until a detailed foul drainage scheme has been submitted to and approved in writing by the local planning authority.
- 4) Forestry Officer - Prior to the commencement of any site works or operations, including demolition and site clearance relating to the development hereby permitted, an Arboricultural Method Statement and accompanying Tree Protection Plan shall be submitted to and approved in writing by the Local Planning Authority.
- 5) Landscape Architect - A management and maintenance plan will be required covering a minimum 20 year period, setting out design principles and objectives, management responsibilities and maintenance operations and schedules, and including a plan indicating which areas of the site the management plan covers and detailing different management procedures for the various landscape types on the site. This can be subject to condition.
- 6) A Construction Traffic Management Plan to be submitted prior to development commencing.
- 7) An archaeological staged investigation is required.
- 8) Details of electric vehicle charging provision to be submitted.

3. Site viability

The Council and site promoter are not aware of any viability issues affecting this site.

4. Ownership constraints

The Council is not aware of any land ownership constraints affecting development.

5. Infrastructure dependencies and enablers

Drawing from both the technical consultee feedback above and the requirements identified in the Resolution to Grant report, the key infrastructure dependencies and enablers for this site, and steps being taken to address them, are as follows:

Community Infrastructure Levy

The development will be required to pay a Community Infrastructure Levy contribution of £905,472.67.

Section 106 Agreement

Currently being finalised.

Education

Education contributions are to be secured via a s106 rather than CIL. The nearest, and designated, school serving this development is St James CE primary school.

6. Site promoter comments

1. Do you have a timeframe to work to as agreed with your client / landowner in respect of target dates for the submission of applications and the receipt of planning permission, are provisions made to any extension of time that may be needed?
2. When do you expect to address the pre-commencement conditions that are likely to be attached to this development, and has any work been done toward discharging these (see section 2 above)?
3. What do you think are the key issues that need to be resolved before the Section106 agreement can be signed?
4. When do you think construction work will commence, and are there any obstacles to starting construction?
5. When do you think the first dwelling will be completed?
6. How many sales outlets will be on site, and will these be present at the same time or in separate phases?
7. How many homes a year do you think this site will deliver?
8. Are there any other comments you would like to raise?

7. Officer conclusion on deliverability

The site is allocated in the Vale of White Horse Local Plan 2031. A full planning for 45 homes has been submitted, with the only remaining issue being the completion of the S106 legal agreement.

However, we have had no response to our requests for information from the developer and work has stalled on progressing the S106 agreement. The application was disposed of and treated as withdrawn on 15 November 2024. Considering this, the evidence to show this site is deliverable in the 5 year period

is not there. We have therefore provided a trajectory for the site that sits outside of the 5-year period.

Assessment of deliverability

1. Current planning status

The site is allocated in the Vale of White Horse District's Local Plan Part 2 for 600 homes. A hybrid application has been submitted on the site comprising:

- 1) outline planning permission, with all matters reserved except for access, for development of up to 660 homes, extra care development of up to 70 units, a local centre of up to 0.5ha, a one form entry primary school on an area for educational provision of up to 2.2ha, playing field and car parking, informal open space, landscape and sustainable drainage areas, access, footpaths, cycle ways, infrastructure and associated engineering works (including a noise attenuation bund and acoustic fence) and
- 2) full planning permission for construction of a three-arm roundabout to the A420 (Oxford Road), a four-arm roundabout to the A415 (Abingdon Road) and link road between.

On the 14 February 2023, the application was put to Planning Committee and a resolution to grant approval, subject to approval of a S106 agreement, was granted. It is a resubmission of a scheme refused in February 2021 (P18/V2791/O) on highway grounds, air quality and the absence of a S106 legal agreement. The agreement was completed 11 April 2024 and planning permission has been issued. The site promoter is currently marketing the site.

2. Technical consultee comments

The below list identifies where technical stakeholders have provided feedback on the proposed development, along with steps the council or applicant are taking to address them. We have graded these as follows:

-  Identifies a serious technical objection with no plan in place to address this
-  Identifies a serious technical objection with a plan in place to address this
-  Identifies no objections to the development
-  Identifies pre-commencement conditions
-  Identifies key consultee yet to respond

Hybrid Permission (11/04/2024)

The resolution to grant permission at Committee identified the following pre-commencement conditions that have been attached to the consent:

1. Traffic and highway safety

- a) The occupation of dwellings on the site will not begin prior to (1) the completion of the upgrade to Frilford Junction unless an alternative phasing plan is agreed with the County Council and (2) satisfactory air quality mitigation for Marcham.
- b) Access to be provided from A420 and the A415 via two new developer delivered roundabouts and a new link road through this site, provided to a standard acceptable to Oxfordshire County Council. The A415 roundabout will link with the business park.
- c) Contribute towards infrastructure improvements on the A420, A415 (including Frilford Junction) and any necessary mitigation measures identified through the site Transport Assessment.
- d) Contribute towards increasing the frequency of bus services.
- e) Provide for buses to travel through the site and provide bus stop infrastructure.
- f) Provide measures to alleviate current traffic flows through the centre of Kingston Bagpuize with Southmoor.
- g) Provide high quality pedestrian and cycle links including pedestrian crossings where necessary.
- h) Replace existing A420 laybys if surveys indicate a need.

2. Urban design

Specific design principles should inform how the southern Green Edge area is brought forward either by condition in advance of a submitted application for this part of the site or to agree these parameters prior to the submission of an RM application for this part of the site.

3. Air Quality

Should the application be approved suggested conditions include a Construction Environmental Management Plan (CEMP) and a phase-specific Biodiversity Enhancement Plan (BEP). In addition, the CEMP shall include the provision of EV charging infrastructure for each property with off street parking and a condition requiring a dust management plan for the development.

4. Drainage Engineer

No objection, subject to conditions:

- a) Detailed sustainable drainage scheme (SUDS).
- b) Scheme for Groundwater monitoring.
- c) SUDS compliance report.
- d) Foul drainage scheme.

5. Contaminated Land Officer

Policy DP27 of LPP2 requires proposals for the development, redevelopment or re-use of land known, or suspected, to be contaminated, to submit a Contaminated Land Preliminary Risk Consultant Report. The applicant has provided a Geo-Environmental assessment with addendums to support the

proposal. Historically the site has been used as agricultural farmland. A limestone quarry was located at the western boundary and infilled with another infilled quarry located nearby. The reports find there is no evidence of contamination being present on site that could prevent development, but the latest addendum recommends gas and ground monitoring to characterise and establish any risk to the development from former quarries and the potential infill. The contaminated land officer has confirmed this can be managed by a planning condition to accord with policy DP27.

6. Community Employment Plan

Policy DP11 of LPP2 states all new development should demonstrate how opportunities for local employment, apprenticeships and training can be created. A Community Employment Plan is required and can be secured by condition to accord with policy DP11.

7. Oxfordshire County Council – Archaeology

No objection subject to conditions:

- a) Archaeological written scheme of investigation.
- b) Staged programmed of archaeological evaluation and mitigation.

8. Forestry Team

No objection subject to conditions:

- a) Tree protection details.
- b) Landscaping scheme.

9. Biodiversity

- a) Great Crested Newts District Licence.
- b) Great Crested Newts Licence Mitigation.

3. Site viability

The Council and site promoter are not currently aware of any viability issues affecting this site.

4. Ownership constraints

The Council is not aware of any land ownership constraints affecting development.

5. Infrastructure dependencies and enablers

Drawing from both the technical consultee feedback above and the requirements identified in the Resolution to Grant report, the key infrastructure dependencies and enablers for this site, and steps being taken to address them, are as follows:

Contributions towards education and waste will be secured through an S106 agreement.

Drainage

The site is in flood zone 1 which is the preferred location for housing development in terms of fluvial flooding. An appropriate drainage scheme can be delivered on the site.

Section 106 Agreement

A S106 agreement is being drafted to secure affordable housing, management and maintenance of onsite open spaces and play area, street naming and bin provision for the dwellings, public transport service improvements, highways mitigation and school improvements and public art. Impacts of the development including those at the Frilford Junction can be mitigated through off site improvement works or financial contributions. Contributions can also be sought for education, bus service infrastructure and waste provision.

6. Site promoter comments

1. Do you have a timeframe to work to as agreed with your client / landowner in respect of target dates for the submission of applications and the receipt of planning permission, are provisions made to any extension of time that may be needed?
2. When do you expect to address the pre-commencement conditions that are likely to be attached to this development, and has any work been done toward discharging these (see section 2 above)?
3. Please provide a timetable forecasting when you will submit reserved matters application/s on this site?
4. What measures are being taken to ensure any site wide conditions can be satisfied before a reserved matters application can be approved (see Section 2 above)?
5. When do you think construction work will commence, and are there any obstacles to starting construction?
6. When do you think the first dwelling will be completed?
7. How many sales outlets will be on site, and will these be present at the same time or in separate phases?
8. How many homes a year do you think this site will deliver?

9. Are there any other comments you would like to raise?

The Promoter and Landowner are currently in dialogue with a preferred purchaser of the land subject of the planning permission. It is currently envisaged that completion of the land transaction will take place late 2024 / early 2025. We currently have no further details in relation to the preferred purchaser's intended timeframe for implementation of the planning permission. However, assuming there are no hold ups with approval of the s278 works, the council's anticipated trajectory of 25 plots delivered in year 2067/27 seems reasonably realistic, with circa 100 plots delivered annually thereafter (i.e. 2 outlets each delivering 50 plots annually).

7. Officer conclusion on deliverability

The site has outline permission for 660 homes and a 70 unit extra care scheme, with detailed permission granted for enabling infrastructure in the form of two roundabouts and a link road. Permission was granted in April 2024.

The planning agent for the site has advised that the site is currently being marketed and the promoter and landowner are currently discussing a deal with the preferred purchaser for the land. It is expected that the completion of the land transaction will be complete by early 2025.

Whilst the planning agent has advised that there are no further details available in regard to the purchaser's intended timeframe for implementation, they have advised the trajectory appears realistic.

Looking at district average lead in times for sites of this size, on average they take 6.8 years from the submission of an outline application to first completion, with 4.4 years being the average from submission of an outline application to outline consent being granted. This average from outline consent to first completion therefore 2.4 years. The outline consent was granted in April 2024, we could therefore expect the first completion to occur in late 2026. The trajectory for housing delivery on the site recognises this, with 25 homes expected in 2026/27. The average build out rate for a site of this size is 133 homes per annum. 25 completions in 2026/27 represents less than a quarter of the average annual build out rate.

To note, the average build out rate was updated to take account of 2023/24 build out figures subsequent to the initial trajectory being developed, which is why the build out rate is higher in the final trajectory.

The site has outline permission for 730 residential units, with detailed permission for the enabling infrastructure. The site is being marketed and is likely to be sold to housebuilder in late 2024 or early 2025. The data we have produced to illustrate average lead in times and build out rates for housing developments in the district indicate that it takes 2.4 years from outline permission being granted to the first housing completion. The progress underway on the site and our district specific

data demonstrate clear evidence that there is a realistic prospect of housing units being delivered within 5 years, and we have assumed 253 units will come forward in the 5-year period.

Assessment of deliverability

1. Current planning status

The site is allocated for development in the Vale of White Horse Local Plan 2031 for 800 homes and has outline permission for 1030 units. Reserved matters have now been agreed for 796 units of which 111 have been completed.

There are two housebuilders on site, Bellway and David Wilson Homes.

2. Technical consultee comments

The below list identifies where technical stakeholders have provided feedback on the proposed development, along with steps the council or applicant are taking to address them. We have graded these as follows:

-  Identifies a serious technical objection with no plan in place to address this
-  Identifies a serious technical objection with a plan in place to address this
-  Identifies no objections to the development
-  Identifies pre-commencement conditions
-  Identifies key consultee yet to respond

There are currently no residential planning applications under consideration for the site.

3. Site viability

The Council is not aware of any viability issues affecting this site.

4. Ownership constraints

The Council is not aware of any land ownership constraints affecting development.

5. Infrastructure dependencies and enablers

The site is dependent on the funding of the Lodge Hill slip roads onto the A34 to the north of Abingdon. The Council attached a condition to the outline consent limiting the occupation of dwellings on site to 400 until the County Council has signed a contract for construction works of the slip roads. Planning approval for the scheme was granted by delegated decision in September 2023. A formal agreement was signed with Homes England in February 2024 to secure an additional £17.3million from Homes England's Brownfield, Infrastructure and Land (BIL) Fund. Contracts with the County Council's appointed 'design' and 'build' contractor, Balfour Beatty Group Limited, were also signed during February and March 2024. Detailed design of the scheme is now underway, with construction on-track to start in 2025.

The Section 278 agreement specifies the following works to support the application:

1. A new ghost island west of Alexander Close
2. A new Toucan Crossing across Dunmore Road
3. A new uncontrolled crossing with refuge island across Dunmore Road
4. A new eastbound bus stop layby
5. A new on-carriageway westbound bust stop
6. A new 3-metre-wide shared surface along the northern side of Dunmore Road

It stipulates that no dwellings shall be occupied in the central parcel until these works have been completed.

There are no other infrastructure constraints affecting the delivery of this site.

6. Site promoter comments

P22/V0680/RM (Bellway Homes):

1. When do you think the first dwelling will be completed?

41 homes are expected to be delivered by the end of 2024.

2. How many homes a year do you think this site will deliver?

P19/V1998/RM (David Wilson Homes)

1. How many homes a year do you think this site will deliver?

*David Wilson Homes
2024/2025 – 100 units
2025/2026 – 70 units
2026/2027 – 22 units*

P17/V0050/O (CEG Promotions):

1. Please provide a timetable forecasting when you will submit further reserved matters application/s on this site? (If the site will be brought forward in multiple reserved matters phases, please provide a timetable for these for the next 5 years)

The land has been marketed and is in the process of being sold. Contracts with the prospective purchasers are in the process of being finalised. Reserved Matters Applications will be submitted subsequent to this. It is anticipated that this will be in the first half of 2025.

2. When do you think construction work will commence, and are there any obstacles to starting construction?

Late 2025/ first half of 2026.

3. When do you think the first dwelling will be completed?
4. How many sales outlets will be on site, and will these be present at the same time or in separate phases?
5. How many homes a year do you think this site will deliver?

60 homes per annum

6. Are there any other comments you would like to raise?

Bellway: We are currently awaiting completion of our water supply and HV electricity supply.

CEG: There are issues relating to the availability of power due to the delays incurred to the offsite-reinforcement works being undertaken by a third party.

7. Officer conclusion on deliverability

The site is allocated in the Vale of White Horse Local Plan 2031. In October 2019 Outline permission was granted for 900 homes, 50 retirement homes and an 80-bed care home. The units from the care home have been counted towards the housing supply with a ratio applied. This represents the number of homes expected to be released in the housing market from residents moving to the care home. We have therefore counted 42 units towards the housing supply from the 80-bed care home. This leads to a total contribution of 992 homes from the site.

796 homes have detailed permission through the two reserved matters application that have been granted permission. These are being brought forward by Bellway Homes and David Wilson Homes. Of the 796 homes, 233 have already been completed. Leaving 563 homes with detailed permission that have not yet been delivered. David Wilson Homes have provided a build out trajectory for their part of the site, which is considered realistic taking into account their previous delivery rates on site. Bellway have indicated they expect 41 units to be completed by the end of 2024 but have not provided any further build out trajectory. Both parcels of land under the reserved matters are currently building out and delivering homes.

CEG are in control of the remaining parcels of land. This represents 104 homes, 50 retirement homes and an 80-bed care home. Their agent has advised that contracts with the prospective purchasers of this land are being finalised and that they expect further reserved matters to be submitted in the first half of 2025, with construction commencing in the first half of 2026 and 60 homes being delivered per annum. Due to the different types of development, it is expected that several developers will deliver the remaining development, supported by the promoter's indication there a number of purchasers. On average we would expect for reserved matters of between 50 to 500 units to take around 10 months to agree. If reserved matters were submitted by mid-2025 then we might expect for them to be agreed by April 2026. Our average lead in time then shows that it takes between 1 to 1.3 years following the reserved matters being agreed to the first homes being delivered. We could then expect the first homes to be delivered from the second half of 2027. The lead in times that are provided by our average lead in time data are broadly similar to those anticipated by CEG.

The agent has indicated that around 60 homes per annum might be expected to be delivered, which is in the approximate range of our average build rates for sites of this size of 52. We have assumed half a years delivery in 2027/28, taking into account the lead in time assumptions above, with 30 homes contributing towards the supply in this year. 60 units are counted towards the supply in 2028/29 and 2029/30, with 4 units delivered in 2030/31. We have separated out the 80-bed care home from this, as due to the nature of this development all units are likely to be delivered in the same year. We have assumed delivery of the care home in 2029/30, with 42 units contributing towards the supply.

Taking into account the above, we consider that there is clear evidence of a realistic prospect of 90 homes being delivered from the remaining parcels of land

related to the outline permission that do not have detailed permission. In total, we expect 545 units to be delivered in the 5-year period.

Assessment of deliverability

1. Current planning status

Roebuck Land and Planning Ltd submitted an outline planning application for up to 175 dwellings in 2021. The site was granted permission on appeal in December 2023. A discharge of condition application for condition 20 (ground water quality analysis and risk assessment) is currently under consideration.

2. Technical consultee comments

The below list identifies where technical stakeholders have provided feedback on the proposed development, along with steps the council or applicant are taking to address them. We have graded these as follows:

-  Identifies a serious technical objection with no plan in place to address this
-  Identifies a serious technical objection with a plan in place to address this
-  Identifies no objections to the development
-  Identifies pre-commencement conditions
-  Identifies key consultee yet to respond

There are no planning applications for residential development currently under consideration. The outline application has been approved.

3. Site viability

Developer confirmed there are no known viability concerns.

4. Ownership constraints

The Council is not aware of any land ownership constraints affecting development.

5. Infrastructure dependencies and enablers

All necessary infrastructure and planning obligations have been secured through legal agreement.

6. Site promoter comments

1. When will a reserved matters application be made for the site?
An initial pre-application meeting has been held with Officers and it is expected that there will be two further meetings prior to submission of a reserved matters application. Our current target is to submit an application in December 2024.
2. When do you think construction work will commence, and are there any obstacles to starting construction?
Subject to approval of a reserved matters application, we anticipate work commencing on site in September 2025.
3. When do you think the first dwelling will be completed?
It is expected that the first legal completion will take place in June 2026.
4. How many sales outlets will be on site, and will these be present at the same time or in separate phases?
Given the size of site, there will only be one sales outlet.
5. How many homes a year do you think this site will deliver?
Approximately 30 dwellings per year.
6. Are there any other comments you would like to raise?
N/A

7. Officer conclusion on deliverability

The site is allocated in the Vale of White Horse Local Plan 2031 for approximately 220 homes. An outline permission was granted in December 2023 for 175 homes. The number of homes approved permission is lower than the allocation figure. This is due to site specific constraints, and it is not considered likely that further homes will be delivered on site in addition to the 175 homes approved through the outline permission.

The developer has advised that pre-application discussions are underway for the reserved matters application, with the application intended to be submitted in December 2024. Subject to the approval of the reserved matters, site work is expected to commence in September 2025 and the first homes delivered from

June 2026. These timescales seem reasonable, with a reserved matters application for a site of this size on average taking 10 months to be agreed. The pre-application advice being sought would hopefully narrow any issues to be addressed through the application process. If an application is submitted in December 2024, then it would give around 9 to 10 months to grant permission and the developer to be on site as expected in September 2025. The developer then expects homes to be delivered from June 2026, around 10 months following commencement. On average for sites of this size in the district, it takes a year from the reserved matters being agreed until the first completion. The developers expected timescales would indicate a slightly quicker lead in time than average, but it is not too dissimilar. We have decided to build some flexibility into the delivery trajectory though, pushing back the first completions to the start of the 2027/28 monitoring year. This allows for any small delays in the submission of a reserved matters application and commencement dates.

The build out rates the developer has provided is for 31 dwellings per annum. Our average build out rate for sites of this size in the district is 37 homes per annum. therefore, the developer build out rate is considered realistic. We have assumed 31 homes will be delivered per annum from 2027/28 until completion.

The information above leads us to conclude that there is clear evidence of a realistic prospect 62 homes will be delivered in the 5-year period.
